

Post-Harvest S.L.A.M. Checklist

Use the below guidelines to help keep your facility sanitized and free of insects throughout your entire post-harvest grain storage process. Use this checklist to record when and how you support your S.L.A.M. program.

ACTION	DATE	DESCRIPTION
Remove vegetation surrounding facilities		
Clean all handling equipment		
Remove grain spills		
Clean storage structures and treat empty bins with Diacon® IGR PLUS		
Inspect points of entry and seals around foundation and base		
Install and maintain adequate aeration equipment such as exhaust vents		
Run fans for aeration		
Treat incoming grains with the grain protectant that meets your needs: Diacon® IGR, Diacon®-D IGR, Diacon® IGR PLUS, Centynal™ EC Insecticide, PBO-8® Synergist		
Monitor stored grain for temperature, moisture, insects and mold
