Insecticide

TO CONTROL STORED PRODUCT PESTS IN STORED GRAIN SORGHUM (MILO),  
CORN, POPCORN, BARLEY, OATS, RICE, RYE, WHEAT  
PROTECTS STORED GRAINS AND SEEDS AGAINST DAMAGE FROM  
INDIAN MEAL MOTH, SAWTOOTHED GRAIN BEETLE, RED FLOUR BEETLE,  
RICE WEEVIL, MAIZE WEEVIL, ALMOND MOTH AND OTHER  
STORED PRODUCT PESTS

- Kills stored product adult pests and exposed larvae
- Breaks the pest life cycle and prevents larvae from maturing into adults
- Two modes of action plus a synergist and seeds
- Residual control
- For use on

## PROBLEM

Rice Weevil

Lesser Grain Borer

Confused Flour Beetle

Indian Meal Moth

Sawtoothed Grain Beetle

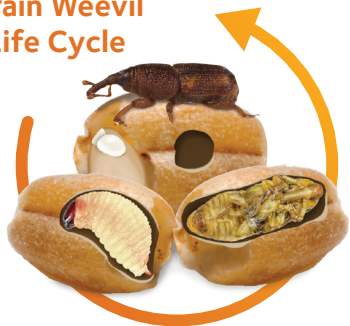

Red Flour Beetle

Granary Weevil

### Grain Weevil Life Cycle

## WEEVIL DAMAGE BENEATH THE SURFACE

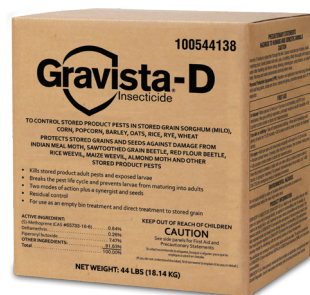

Because of the way weevils transform from an egg to an adult isolated inside the grain kernel, they can be a difficult insect to see and control.

Once you see insects, damage is already done. Don't wait, prevent with Gravista®-D Insecticide.

## SOLUTION

Stay one step ahead of the monster problems these tiny insects can cause, from the moment your grain is stored to when it goes to market.

- Combines a synergized adulticide with an insect growth regulator
- Kills listed insects, including weevils
- Breaks the insect life cycle, preventing larvae maturing into adult insects
- Ready-to-use formulation
- 11 lb. per 1,000 bu. of commodity
- Offers residual control
- Non-restricted use
- Apply as empty bin pretreatment, to processing areas, and to cracks and crevices
- Apply directly to grain or seed as it is moving into storage
- CODEX approved for cereal grains

## RESULTS

### Let the Numbers Speak for Themselves

|  | UNTREATED Corn* |                     |           |  | BLENDED Corn (5k buggy grain with 5k good grain)* |                     |           |

Our proven products have been protecting commercial grain from insects for years. Now we're bringing that expertise directly to the farmer. Gravista®-D Insecticide can help:

- ✓ Reduce shrink due to uncontrolled insect damage
- ✓ Reduce grain dockages and IDK (insect damaged kernels) by up to 18%\*\*; resulting in higher profitability
- ✓ Improve your bottom line by controlling these insects and the damage they cause
