## Diacon®-D IGR

From silos and grain elevators to warehouses and storage bins, Diacon®-D IGR can go where stored product insects go to provide long-term control and profit protection. A dry formulation insect growth regulator designed for locations where water is scarce, Diacon®-D IGR is a ready-to-use option for controlling insects at on-farm and off-premise storage sites. Approved for use on malting barley, Diacon®-D IGR prevents larvae from maturing into adults to help end insect infestations and prevent rebound.

### Diacon®-D IGR Features:

- An insect growth regulator that breaks the insect life cycle
- The active ingredient (S)-methoprene
- Ready-to-use formulation
- Labeled for all stored commodities and foods
- Application to the grain stream
- Application as an empty premise treatment
- Approved everywhere grain insects infest
- A long residual
- EPA tolerance exempt
- Protection against reinfestations

## Centynal™ Insecticide

Centynal™ Insecticide kills a broad spectrum of stored product insects on contact. When mixed with water and kept under constant agitation for an even application, Centynal™ Insecticide helps protect malting barley against damage from the lesser grain borer, various flour beetles and more. At the labeled rate of 7.31 fl oz per 1000 bu of barley, Centynal™ Insecticide will continuously kill insects for up to 120 days. Check with your ag-chemical dealer or Centynal™ Insecticide representative for advice on proper application equipment.

### Centynal™ Insecticide Features:

- Broad-spectrum insect control
- The active ingredient Deltamethrin
- Long-lasting residual
- Signal word Caution
- Low toxicity profile
- Broad use pattern
